

KEANU NICCOLO SISON

AppSheet Developer & Process Automation Specialist

Marikina City, Philippines | 0926-626-7336 | ksison001@gmail.com | keansison.com | Kytus Data Solutions

PROFESSIONAL SUMMARY

Results-driven AppSheet Developer and Process Automation Specialist with extensive experience building custom no-code and low-code business systems for academic institutions, Google-partnered technology companies, and international clients. Deep expertise in AppSheet application development, SVG-driven UI/UX design, workflow automation via Make.com and N8N, and data visualization through Looker Studio. Proven track record of eliminating operational bottlenecks, reducing manual workloads, and delivering scalable, production-ready solutions across CRM, inventory management, project management, and document generation systems.

CORE COMPETENCIES

AppSheet Development & SVG UI/UX

Expert-level AppSheet application development | Custom SVG for UI/UX | LongText HTML & Image column types | Dynamic KPI widgets & progress trackers | Conditional SVG rendering | Data URI encoding

Automation & Integration

Make.com | N8N workflow automation | AI agent development | API & webhook integration | Google Apps Script

Analytics & Data Management

Looker Studio interactive dashboards | Data modeling & ETL | KPI development | Google Sheets (advanced functions) | Database design & optimization | Data cleaning & validation | Quality assurance

PROFESSIONAL EXPERIENCE

Technology Solutions Consultant 2026 — *Google Partner Company*

- Developed multiple production ready AppSheet applications for diverse client requirements
- Built and maintained polished demo applications showcasing AppSheet capabilities with custom SVG UI components and dynamic dashboard visualizations.
- Designed document generation systems featuring HTML-to-PDF output and automated revision tracking logic.
- Led process improvement and automation initiatives integrating AppSheet with Google Workspace, Make.com, and N8N for end-to-end operational workflows.
- Collaborated directly with clients to assess requirements, scope solutions, and deliver scalable business systems aligned to organizational objectives.

Database & Process Automation Specialist 2021 – Present *Ateneo de Manila University, Office of Student Affairs & Services*

- Built a comprehensive management system encompassing multiple student-facing workflows across departments and Offices
- Designed custom UI/UX and automated email notification templates for university wide operational reporting.
- Lead end-to-end system development, maintenance, and continuous process improvement initiatives spanning multiple offices within the university.
- Drive data analytics and Looker Studio reporting to support evidence-based strategic institutional decisions.

Tech Lead Nov 2024 – Feb 2026 *Front Row Furniture — UK-based Client*

- Led end-to-end development of CRM system, Inventory management and Project management tool
- Developed an enterprise ticketing system integrated with team communication platforms via webhooks for streamlined issue resolution.
- Designed interactive Data Studio dashboards and a logistics delivery planning system providing full operational oversight.
- Implemented an AI-powered sales chatbot, improving lead response times and pipeline visibility for the sales team.
- Oversaw technical direction, system architecture decisions, and platform integrations across all business systems.

Website & AppSheet Developer 2023 – 2024 *Elite IP — Consultant*

- Developed a complete business website with optimized user process flows and structured content architecture.
- Built a lead management system with vendor tracking integration and automated follow-up workflows.
- Created a CRM solution with advanced analytics dashboard for real-time sales pipeline visibility.

HR Data Analytics Specialist 2017 – 2019 *ReadyMan Inc*

- Transformed HR operations through advanced data analytics, reporting automation, and process documentation.
- Built comprehensive KPI dashboards tracking headcount, turnover rates, and end-to-end recruitment metrics.
- Reduced hiring time by 35% through targeted process optimization and data-driven workflow redesign.

PORTFOLIO HIGHLIGHTS

Project Management System

Custom AppSheet application for end-to-end project tracking with task assignment, progress monitoring, deadline management, and SVG dashboard visualizations. Demo: appsheet.com/start/c334d061-def1-4787-bdab-5d088b5d28fd

CRM & Lead Management System

Advanced CRM solution for lead tracking and pipeline management, featuring lead scoring, automated Make.com follow-up workflows, conversion tracking, and analytics dashboards. Demo: appsheet.com/start/c1b48401-ad92-478b-98de-5adb9daa7317

Order Management & POS System

Complete point-of-sale and order management system with item selection, quantity management, automatic total calculation, and streamlined order processing workflows. Demo: appsheet.com/start/d62f57ca-62b0-417b-a39d-e794f7e474b7

EDUCATION

Bachelor of Science in Psychology Graduated 2017 *Trinity University of Asia*

- Transitioned into no-code/low-code systems development through self-directed learning, beginning with advanced Google Sheets and progressing to AppSheet, automation platforms, and data visualization tools.
